I respectfully urge that the FCC reject the NAB's petition 04-160. I support XM radio (we have 4 receivers - both cars, home and work computer and we purchased a 5th for my son for Christmas this past year).

I am a firm believer in XM satellite radio and, frankly, can't wait for them to start offering instant traffic and weather reports in the Atlanta area because local TV and radio stations simply aren't giving us the information we need to make snap decisions in a timely and efficient manner.

To be honest, since I've started listening to XM, I rarely ever turn on a local station - and when I do the proliferation of commercials and small talk is enough to send me scrambling back to my XM.
